

Helping Nursing Programs Tackle the Transition to Competency Based Education

Let us handle your CBE journey so you can focus on your students.

Transitioning your program to a CBE model is difficult, time consuming, and overwhelming.

WGU Labs CBE Transformation Services makes it easy to **map** your program to AACN competencies, **train faculty** how to update courses, and **shift** your nursing program to competency-based without disrupting the delivery model.

Services

CBE Readiness Assessment

We leverage insights from leadership and faculty, coupled with an in-depth review of your institutional and program data, to create a CBE Playbook specific to your institution's needs.

PROGRAM ANALYSIS

- Surveys and discussions with leadership and faculty to document needs, readiness, and recommended CBE model.
- Review program content and documentation against AACN industry standards.

CUSTOMIZED CBE PLAYBOOK

- Map learning outcomes and competencies to assessments and course activities.
- Develop a CBE transition plan that aligns with your strategic goals, needs, organizational culture, and brand.

CBE Training Workshops

Guided by your implementation plan, we will empower, educate, and support your faculty through the curriculum conversion process via a 5 workshop series:

- Participants learn CBE design and pedagogical concepts including Backward Design, active learning, curriculum mapping, and assessment strategies.
- Remote or in-person facilitation by Learning Experience Designers and nurse-practitioners with supplemental asynchronous modules.

Comprehensive Program and Curriculum Services

Prefer to save your faculty and administrators the headache? WGU Labs can tackle the entire CBE transition for you to bring scalability, personalization, and continuity to your program.

- Labs will leverage user-centered design to create a suite of CBE curriculum, assessments, and learning activities.

Why WGU Labs

- WGU Labs' CBE nursing transformation service originated in the Michael O. Leavitt School of Health, **which produced 17% of all graduating nurses in the nation in 2021**, and utilizes best practices in CBE curriculum development.
- Dedicated Learning Experience Designers who can augment your internal capacities and develop curriculum on your behalf leveraging user-centered design.
- The WGU Labs team offers CBE as a teaching methodology without modifying your business processes to ensure your nursing program keeps its unique differentiators while complying with AACN requirements.

“ We appreciated Labs' ability to work with us to customize their workshops and materials to align with our needs. ”
